

Sport Trainers Squared multiplier events in Athens, Greece

In the framework of the Sport Trainers Squared project, Symplexis organised a series of Multiplier Events in March and June 2025, in Athens, Greece, in order to disseminate the project's findings and the training resources developed, as well as to facilitate networking amongst the interested parties.

The events attracted more than 50 participants from various backgrounds (sports coaches, professionals working with migrant and refugee populations, adult educators/trainers, psychologists, physiotherapists, and other NGO representatives), thus successfully disseminating the project and its results to the wider public and the project's target groups.

The Sport Trainers Squared project is an Erasmus Sports project, which started on 1/1/2023 and will end on 30/6/2025 with the participation of partners from Poland, Germany, Italy, Spain, Slovenia, Greece. It focuses on: a) identifying methods and practices that can be used to prepare migrants to become sports trainers, transforming them into a training format, b) identifying the existing knowledge of sports coaches (belonging to "team sports") in order to train migrants, elaborating an online course based on their needs and c) empowering disadvantaged migrants and preparing them to become Sports Instructors through Education Through Sport (ETS) methodology.
