RomInDis

NEWSLETTER —ISSUE2 – NOVEMBER, 2026

Enhancing support for Roma people with physical disabilities to access health structures and benefits (RomInDis)

PROJECT UPDATE

WP2 — TRANSNATIONAL REPORT PUBLISHED

The RomInDis Transnational Report has been completed and published on the project website. It brings together research findings from six countries, identifies key knowledge and skills gaps, and presents 18 good practices to improve cooperation between Roma Health Mediators (RHMs) and Health Professionals (HPs).

Read the Transnational Report here:

WP3-TRAINING MATERIALS AND DIGITAL RESOURCES MATERIALS

The project's capacity-building materials have also been prepared and are in the translation phase, ensuring that the resources will be available in the project partners' languages and support the training of Roma Health Mediators and Health Professionals.

These resources aim to strengthen cooperation between RHMs and HPs and improve access to healthcare for Roma persons with physical disabilities (PWPD).

The **Detailed Digital Guide and Action Protocol for Roma Health Mediators (RHMs) and Health Professionals (HPs)** has been finalised in seven languages. It provides practical guidance on how RHMs and HPs can work together to help Roma people with physical disabilities overcome barriers to healthcare, better understand their rights and access the health services and benefits they need.

The interactive, multilingual e-learning platform is currently under development and will provide accessible health literacy learning resources for Roma people.

TRANSNATIONAL PROJECT MEETING IN WUPPERTAL – GERMANY

PARTNERS MEET IN GERMANY - WUPPERTAL

The RomInDis Consortium met in Wuppertal, Germany, on 15–16 October 2026 for its second transnational project meeting

Partners reviewed progress across the work packages, discussed the development of training materials and digital resources, and coordinated the next steps for project implementation.

The meeting also provided an opportunity for partners to share updates on their ongoing activities, exchange experiences and address key priorities for the coming months. Particular attention was given to strengthening cooperation between Roma Health Mediators (RHMs) and Health Professionals (HPs), as well as preparing resources and awareness-raising activities to improve healthcare access for Roma persons with physical disabilities.

The meeting also helped partners clarify their responsibilities and priorities for the coming months, with particular attention to completing outstanding tasks, following the agreed timelines and strengthening coordination across the work packages.

The discussions reinforced the importance of continued cooperation among all partners to ensure the timely development of project resources and the successful implementation of the planned activities.

Partners also exchanged experiences and discussed practical steps to address current challenges, helping to establish a common approach to the next phase of the project and ensuring that planned activities and outputs continue to contribute to more inclusive and accessible healthcare services.

WHAT COMES NEXT?

WP3 — CAPACITY BUILDING AND TRAINING

The project continues to develop and prepare capacity-building activities and training resources for Roma Health Mediators and Health Professionals. These activities aim to strengthen knowledge, skills and cooperation to support more inclusive and accessible healthcare services.

WP4 — GOOD PRACTICES AND RECOMMENDATIONS

The next phase includes developing a Digital Code of Good Practice and a Digital Compendium of recommendations. These resources will bring together practical approaches and recommendations to improve healthcare access and support for Roma persons with physical disabilities (PWPD).

ROMINDIS AWARENESS-RAISING CAMPAIGN

With this edition of the RomInDis Newsletter, we are officially launching our online awareness-raising campaign to promote the social inclusion of Roma People With Physical Disabilities (PWPD) and challenge the stigma, misconceptions and taboos surrounding disability within Roma communities.

The campaign will feature three targeted leaflets and six videos designed to raise awareness, promote understanding and encourage more inclusive attitudes. Updates and campaign materials will be shared through the project's social media channels — Facebook, Instagram and LinkedIn with contributions from all project partners. We invite Roma communities, healthcare professionals, organizations and all interested stakeholders to follow our social media accounts and share our content to stay informed and help the campaign reach a wider audience.

Upcoming activities also include five national multiplier events in Greece, North Macedonia, Germany, Sweden and Romania, followed by a European conference in Barcelona, Spain.
